

Latch action toggle clamps are available in three types, with a horizontal, vertical or hook action. The latch action allows two faces to be fastened together on the same plane or at 90°. They have the advantage of having a low profile and so are most suitable for applications having a height restriction. The latch action makes this clamp ideally suited for applications on mould box lids, quick release covers, hatches and doors.

Features include:

- Red vinyl hand grip with cushioned rib profile for improved user comfort.
- All body and linkage components on the light duty range are zinc plated to resist corrosion.
- The heavy-duty range has wide flanged bases for strength and rigidity.
- Pivot points are fitted with hardened steel or stainless steel rivets to maintain accuracy and provide a long service life.
